

Freudenberg, North Shields. 14 Meter scrap chute from Premitec

Running along the back of four presses the Electro Mechanical Vibratory Scrap Conveyor is positioned to allow the scrap to drop into the reciprocation tray, which then due to its action, transports the scrap along the horizontal tray into waiting bins.

14 Meter tray taking scrap away behind four presses.

Gearbox attached to the tray.

Floor mounted Vibratory Motor & Gearbox.

Max Tray Weight = 35KG
Horizontal tray – No incline needed.
No conveyor belts to replace
No pneumatics to fail
‘Fit it & Forget it’
